

ANCHOR – ADMIRALTY \$30

Heavy galvanized folding admiralty anchor, the T bar at the end fold in line with the main shaft so the anchor can be stowed flat. Excellent condition.

ANCHOR – FLOOK \$30

When launched into the water from a boat it automatically takes off and flies out through the water at a glide angle of 5 metres across for every 1 metre down until it lands on the seabed.

A trail of bubbles indicates its flight path and its final resting place. It is directionally accurate to within a few degrees. A quick rearward jerk on the line opens its unique differential pantograph and drives the flukes into the sand or mud.

DECK WINCH - XTRA LARGE – 2 SPEED FRANCIS \$350 SYDNEY

This is a beauty, it is a huge 2 speed deck winch (for rope). You would need to have a big yacht to even consider this one > 45'. It is of chromed brass or bronze, works well and is built to last several lifetimes. It is Australian made, comes with a matching heavy Francis winch handle.

The winch is in very good overall condition, even the chroming is good considering it's age, only thinned out on the lower flange of the drum, the knurling on the drum is in excellent condition. The gears inside do not show signs of wear.

Winch weight is 20kg, the handle is 1.4kg. For Postage would have to separate due to 20kg maximum with Aust Post.

Dimensions, base dia 245mm, top dia 200mm, drum dia 120mm, height drum 180mm, height complete 220mm.

They do not make them like this any more. Cockatiel not included !

LIFEBUOY / LIFERING - SUPER TOUGH - \$ 50

Super strong plastic and brightly coloured.

TIMBER BELTING FOR TOPSIDES \$25 SYDNEY

Obviously a good marine timber as it stood the test of time on our yacht before we discarded the belting altogether.

It is a U profile so that fasteners can fit underneath out of sight. Could be used on any type of hull. 54mm wide and 33mm deep.

In good condition with regular screw holes where it was fastened.

The lengths are 3430mm, 3100mm 4000mm 4300mm.

RONSTAN STAND UP BLOCKS - RF872 - New \$80 EACH.

For sale are some Ronstan stand up block RF872. <http://ronstan.com.au/marine5/product.asp?ProdNo=RF872>

Weight 342gms. Pulley diameter is 60mm. Retail price is \$115. I have up to 3 available.

CLOSED BODY TURNBUCKLE WITH SWAGED END - GRAHAM, NZ MADE - 9/32. UNUSED \$50

For sale is a new Graham closed body turnbuckle with swaged wire terminal fitting.

Terminal end is for 9/32" wire, the clevis pin needed is 1/2". Made in NZ. Weight 848gms.

This turnbuckle is unused, however it does have some tarnishing spots as it was carried as a spare for several years. There is no clevis pin included.

SS INSTRUMENT SURROUNDS WITH LID - \$ 55 EACH

These Stainless instrument surrounds were in our yacht before restoration, they would not fit into the new cockpit configuration. They are well made from medium weight SS, welded at the seams. There is a close fitting lid that covers the instruments when the vessel is not in use.

STOWE SPEED LOG – ELECTRONIC

The AWA-Stowe speed log is complete. That is there is the readout, the through hull log with through hull tube and a blank, also has wires.

STOWE DEPTH SOUNDER

Complete unit with large digital readout, cables, through hull transducer. Has all the essential functions, alarms, etc.
