

OOPS!

M.O.B is a terrifying sound
voracious predators are known to be around

Pass the shifter
the shakle key has met it's match

Hazardous ten feet
to the foredeck and back

Return trip via the ocean
not a sound was heard
but the lifeline wasn't slack

Helping hand to shelter
dry clothes,short rest
but butter would have melted

The wind,water,air and boat warm to the smile
but no time to gloat

The sail still had to be changed
the passage still had to be made

Keeping in mind the sound of M.O.B
and predators are known to be around
