

Support : Examples of Heat Exchanging

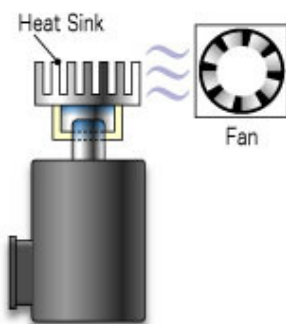

Support

① Direct Cooling

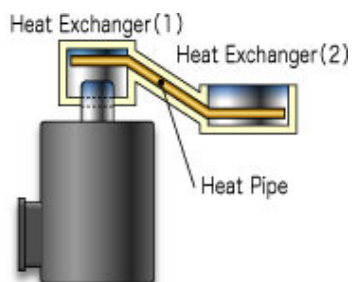

Direct cooling with the heat exchanger on the cold side of FPSC.

▼ See More

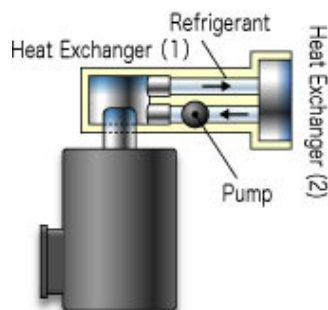

② Heat Transfer with Air Flow

The air is cooled by the heat sink on the cold side of the FPSC and flow with the fan.

③ Heat Transfer with Heat Pipe

The heat is transferred through the heat pipe between heat exchangers.

④ Heat Transfer with Refrigerant Circulation

The heat is transferred by the refrigerant circulated with pump between heat exchangers.
