

**Table 5: New Brighton Beach Location, Shana Ray, 5:1 Scope**

Anchor Model	Max Tension	Observations
Rocna 35	>5,000	Set immediately, but began dragging. Tension shown indicates a single spike on the graph. Anchor would not reset after it released. This tension is not representative of the actual performance.
XYZ	314	Stable dragging over a long distance.
West Marine Performance 20	1556	Set, stable dragging, intermittently, shock loaded, released and would not reset.
Manson Supreme (Stainless 35)	2,338	Set, stable dragging, intermittently, shock loaded, released and would not reset.
Bulwagga 20	1,390	Set, stable dragging, intermittently, shock loaded, released and would not reset.
SARCA XX	2,058	Set, stable dragging, intermittently, shock loaded, released and would not reset.
WASI 35 SS	1,752	
Oceane 35	424	Stable dragging, eventually released
CQR 35	450	Momentary sets followed by releases
Delta 35	2,226	Set, stable dragging, intermittently, shock loaded, released and would not reset.
Claw 15 kg.	686	Set, stable dragging, intermittently, shock loaded, released and would not reset.
Fortress FX-37	2,082	Set, stable dragging, intermittently, shock loaded, released and would not reset.
Spade S100	1,584	Set, stable dragging, intermittently, shock loaded, released and would not reset.
Hydrobubble	1,654	Set, stable dragging, intermittently, shock loaded, released and would not reset.
