

# LID B - Camera lens aperture

Camera lens aperture design, inspired by Joseph Joseph's spaghetti measurer. Lid opens and closes by a slider. When open, lid provides a perfect circle to eat from. Challenge involves closing it completely.

## LID C - Push to open, hinge lid

Spring loaded lid - inspired by bin lid mechanism. Push down to open - lid operates on hinge. Easy to close quickly.

## LID D - Push down lever to open lid

Leverage mechanism. Push down on lever to open lid. Could be tied in with spring release method.
